

BATTERY TERMINAL

Spanjaard Battery Terminal Protector is a clear, drying, anti-corrosive film for battery terminals and other metal surfaces, in an easy to apply, ozone-friendly aerosol.

DIRECTIONS FOR USE

1. Disconnect battery leads,
2. Remove battery if required. Wash terminal and battery cradle with Sodium Bicarbonate Solution. Clean terminals with emery paper.
3. Rinse areas with water and allow drying. Spray battery cradle evenly with **Spanjaard Battery Terminal Protector** from a distance of 30cm and allow drying.
4. Replace battery and reconnect terminals and also spray these with product from a distance of 30cm. The initial cloudiness will disappear when the coating is dry.
